

Short description of the tour/route characteristics: The route leads first from Arco to the ridge of Monte Bondone. Lonely, partly narrow, partly wide roads characterize this section. Wonderful views of the valley are as much a part of it as great curve combinations. The final section is the 40+ hairpin bends down to Trento. Via Lavis the road leads to Mezzolombardo. Here, a wide road, peppered with clearly visible curve combinations, branches off up to Fai della Paganella. Via Andalo and Molveno it continues south. The detour via Stenico to Tione shows wonderful exchange rate curves, which invite you to ride a motorcycle. The stretch from Tione to Lake Idro is not very attractive, but the following section is even more so. Along the Idro Lake there are already one curve after the other. On the further way back to Lake Garda the route becomes really round. Up to Cappovalle, Moerna, Persone you reach the Lago di Valvestino and get onto a stretch where you can ride dizzy. One curve after the other, from the left to the right and again to the left - no end in sight - simply gigantic! After Gagnano the road goes down steeply in many serpentines. Shortly along the lake to the north it goes up again to Tignale and Tremosine - a labyrinth of curves par excellence! In Limone the Garda Lake is reached again and via Riva del Garda we return to the starting point.
