

Route description/characteristics: The tour is characterised by wonderful landscape impressions and beautiful curve combinations paired with predominantly low traffic volume.

First you have to reach Bolzano from Montan via Ora and Laives and drive through the city centre towards the Sarentino Valley and then turn left to reach the turn-off to Jenesien. From here, the road continues to climb uphill on a well-developed wide road - accompanied by beautiful views of Bolzano. After Jenesien the road becomes narrower and remains so until Mölten. There the tour turns right and leads via Vöran to Haflings and on to Meran. There keep left and follow the signs to Lana. From there the Ulten Valley (turn left) is signposted.

Follow the road past the Zoggler reservoir to the end of the valley at the Weissbrunnsee. Here you can take a break at the Gasthof Knödlmoidl.

Return to the turn-off towards Laurein. There turn right and via Laurein to Fondo. Here begins the short but great section up to the Mendelpass. At the top of the pass, the path branches off to the left up to Monte Penegal. Those who have been here before will always like to go up again, because the view down into the valley of Bozen to beyond Lake Caldaro is simply beautiful!

After this detour, we return to the top of the Mendel Pass and from there we continue towards Kaltern. Turn right over S. Nikolaus to reach the main road to Lake Kaltern. Turn right there and then immediately left towards Laimburg. After a few kilometres over the hill you reach Auer and from there Montan.

Total distance approx. 200 km
